Dear Tom: Subject: C&W Circuit Speed

Your letter of 22 June on the above subject confirms our suspicions that the [redacted] will probably drag its feet indefinitely on the loop bypass proposal. From the information provided, it is not now certain that any advantage will be gained through the bypass, at least at this time. I therefore request you defer the proposal for an experimental bypass. 25X1A7B

In the fall when Roger and Wally visit the Bureau, they may take another look at this. Meanwhile, our initial experience with the [redacted] patch should provide us with firm evidence of whether the Cables and Wireless performance is consistent as claimed. 25X1A7B

Sincerely,

25X1A9A
